

FOR IMMEDIATE RELEASE

DURANGO, CO – February 23, 2010

New Aldelo EDC 6.2 Supports Retail and Canada
Mercury Payment Systems to process payments

Aldelo Systems, a leading provider of hospitality technology solutions, today announced a new version of Aldelo EDC, a point-of-sale (POS)-integrated payment processing solution. The new EDC features four retail-specific payment processing functions: EBT, check verification, U.S. and Canadian PIN debit. Aldelo's integrated payments partner, Mercury Payment Systems, is the sole processor supporting the payment transactions.

The enhancement creates new sales avenues and expands Aldelo's vertical and geographic market reach in three ways. First, the new EDC allows Aldelo Systems, best known for streamlining hospitality operations, to support integrated payments for retail sales. Second, Canadian businesses can now use Aldelo POS with integrated payments for hospitality or retail operations. Third, the new EDC addresses increased consumer demand for PIN debit payments, especially in Canada where PIN debit makes up nearly seventy percent of card payments.

"We're excited that our first integration with debit and PIN debit type transactions is available in both the U.S.A. and Canada," said Harry Tu, CEO, Aldelo Systems Inc. "It's an excellent time to offer this functionality because the market is encouraging PIN debit use in the U.S.A., something that is already heavily used in Canada."

The EDC is fully integrated to Aldelo POS solution for reliable, high-speed internet credit and gift card processing. Aldelo's payment processing partner, Mercury Payment Systems, is integrated to previous Aldelo EDC releases, and is the sole processor for the new EDC functionality. MercuryGift® offers Aldelo users multi-location gift card processing with no transaction fees. The solution is Visa PABP-validated and PCI-compliant.

"Aldelo resellers can use the new functionality to expand their portfolios," said Bart Collins, business development manager, Mercury Payment Systems. "Aldelo's EDC, with Mercury integrated for payment processing, is a proven solution that has all the features customers want and need. Both retail and hospitality businesses can now process payment transactions in the U.S.A. and Canada with confidence."
